- Commitment Control enables an organization to budget check its transactions against predefined budgets to achieve budgetary control.

- Commitment Control Tools:
  - Control Tool – to prevent spending outside of authorizations
  - Management Tool – to record and monitor activities (actuals) against budgeted targets
  - Reporting Tool – to produce reports on budgets and related activities (actuals and remaining spending authority)

- ◦ Budget Act
- ◦ Special Legislation (non-budgeted)
- ◦ Continuing Appropriations
- ◦ Continuous Appropriations
- ◦ Operational Budgets

CC_REV   Budget Act Reimbursements

CC_DETAIL   Expenditures at the detail/lowest level

CC_DTL_REV   Reimbursement and Revenue activity at the detail/lowest level

Labor Distribution

Labor Distribution

State Controller's Office (SCO) pays labor costs out of a department's main item clearing account. However, these costs may not be accurately reflected in the fund and program SCO charges.

The Labor Distribution (LD) process creates accounting entries to record a department's payroll transactions at a lower level of detail.

Labor Distribution

Departmental Labor Tasks / Process Flow

After FI$Cal stages the payroll file, departments perform the following tasks:

▶ Validate labor configurations

▶ Run payroll queries before & after LD (see subsequent Power Point slide)

▶ Run labor distribution

▶ Review and correct labor errors

▶ Re-run LD process as many times as needed to fully distribute payroll costs
  ◦ Refer to job aid FI$Cal.184 for running LD

▶ Create a payroll journal for CLO JEs that represents Payroll Clearing account amounts

▶ Verify Payroll Clearing account is $0 balance in ledger inquiry or DFQ_KK_01_ACTIVITYLOG_SUP_PROJ query

▶ Reconcile labor transactions with SCO (see subsequent Power Point slide)

Refer to DOF's FI$Cal Overview training material for detailed LD steps and processes

LD Tips

▸ *Labor staff knows* the department's labor configurations

▸ Understand the labor Queries (job aid FI$Cal.084)

▸ Run payroll queries **before** first LD run <u>and</u> **after** each LD run

▸ Track *every* LD run process instance with description (i.e., which month(s) are being distributed, Personal Activity Sheet (PAS), Adjusted PAS, override, etc.)

▸ Perform LD reconciliation (refer to FI$Cal Overview training material for detail LD steps and processes)

ZZ_MEC_ENTRIES_NOT_SENT_TO_GL
Query

ZZ_MEC_ENTRIES_NOT_SENT_TO_GL

▸ Run ZZ_MEC_ENTRIES_NOT_SENT_TO_GL per Job aid FI$Cal.009 steps

▸ This query consolidates various ZZ_Entries_NotSentTo_GL queries from AP, AR, LD, PC, BI, AM and GL Modules include sub-system journals

▸ If there are entries identified on the ZZ_MEC_ENTRIES_NOT_SENT_TO_GL, run the appropriate submodule queries (see job aid FI$Cal.037 for various queries).

▸ Recommended practice is to run this query weekly to stay on top of various transactions that are not sent to GL

▸ Research and determine if transactions can be resolved by processor, approver or FSC

▸ Departments can not close subsystems until ZZ_MEC_ENTRIES_NOT_SENT_TO_GL query is cleared

Verify Sub-Module Transactions are Sent to GL

Important Note :

Recommended practice is for staff to run the ZZ_MEC_OUTSTANDING_TRXNS, ZZ_MEC_ENTRIES_NOT_SENT_TO_GL, and other appropriate queries periodically during the week, to review and resolve transactions that have not posted in the sub-modules and/or sent to GL.

Resolve outstanding and not sent transactions in a timely manner to avoid reconciling items at month end.

Update Online MEC Status

▸ Online Month End Closing (MEC) Reporting Tool (Job aid FI$Cal.335) provides departments the steps on how to report MEC activities online in FI$Cal.

▸ MEC Dashboard calculates % of completion based on below options reported on the Summary Task or Detail Task screen:
  · Completed
  · In Progress
  · Not Applicable
  · Not Started
  · On Hold

▸ Update MEC Status if appropriate tasks are "In Progress" or "On Hold" so that MEC Dashboard can display 25% completion or more as to 0%.

▸ When all tasks reported as "Completed" and/or "Not Applicable", the MEC Dashboard will report 100% completed for the accounting period.

▸ FI$Cal will produce project status reports based on this data. Therefore, Departments must ensure accurate and timely updates no later than the 1st and the 15th of each month.

Enter Submodule Transactions and Run Labor Distribution, Summary Tasks are "In Progress"

Example

MEC Dashboard (period 8) displays 25% as oppose to 0% for Summary Tasks "In Progress" or "On Hold"

Request to Close Subsystems

▸ Send an e-mail to FSC to close subsystems:

- FSC e-mail address fiscalservicecenter@fiscal.ca.gov
- Copy FI$Cal MEC-YEC Close Request
    MEC-YECCloseRequests@fiscal.ca.gov
- Please close (enter Month) subsystems for (enter dept. name, BU#).

▸ FSC will close AP, AR, BI and PC

▸ Verify subsystems closure (see the following example)

Commitment Control vs. General Ledger

Commitment Control :

▶ Budget

▶ Appropriated Encumbrances (Purchase Orders)

▶ Appropriated Expenditures

▶ Reimbursements

▶ Revenues

General Ledger (MODACCRL Ledger):

▶ Appropriated Expenditures

▶ Unappropriated Expenditures

▶ Reimbursements

▶ Revenues

Note: Only appropriated transactions will post to Commitment Control. Transactions posted incorrectly to Unappropriated Expenditure accounts must be corrected in order to reduce appropriation balances in KK.

Accounts Payable Reconciliation

Voucher Life Cycle

The FI$Cal Accounts Payable process starts when a department receives an invoice from a vendor for goods or services.
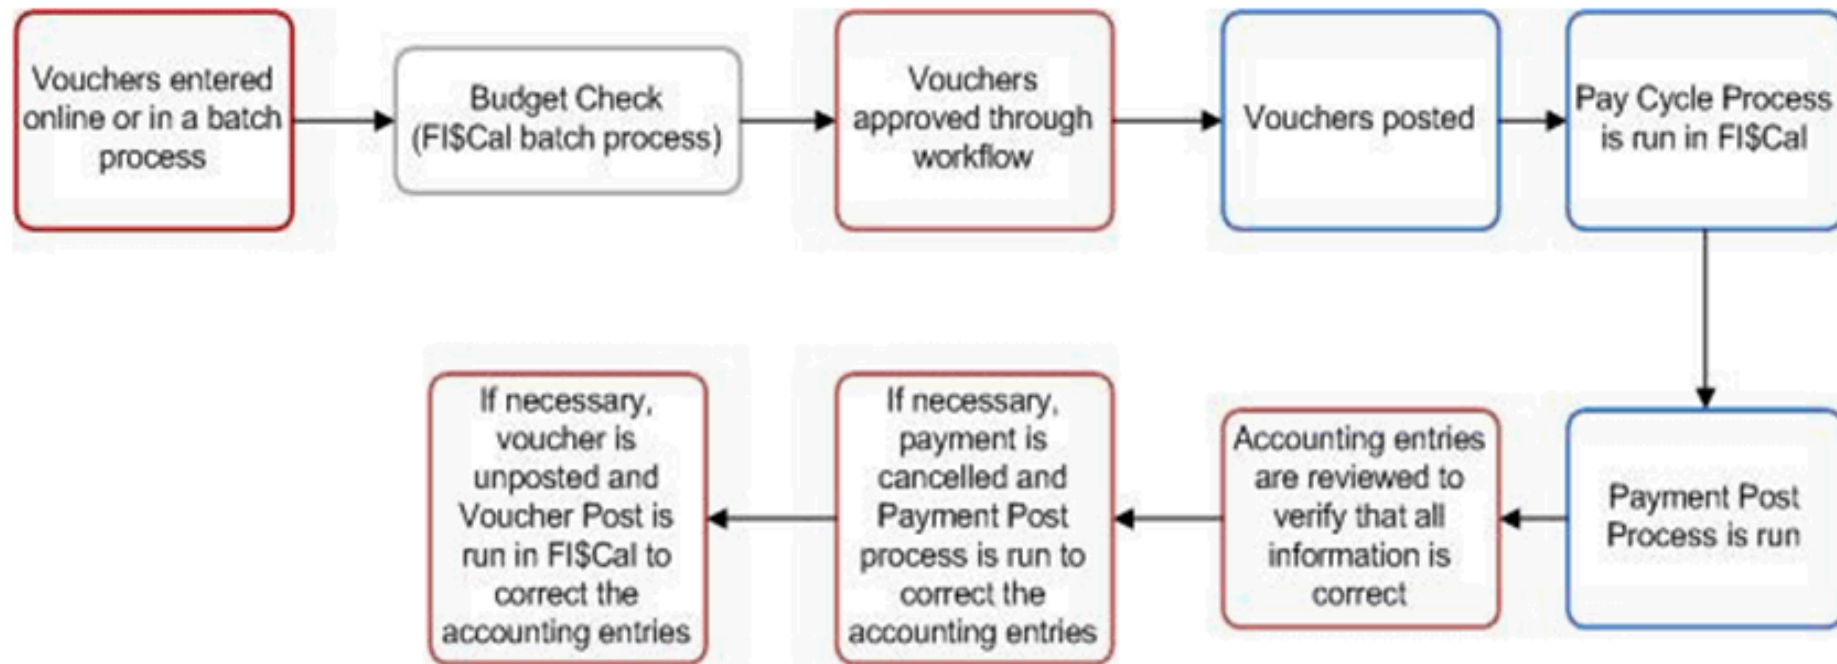

FTA– AP 100

= Department
= FI$Cal system process
= Department-run FI$Cal system process

198

Accounts Payable

▶ The Accounting Entries to debit Expenditures and credit Accounts Payable are automatically recorded in the GL after the Voucher is approved and posted by SCO

▶ Accounts Payable GL 2000000 is a control account. Only system generated entries can post

▶ Accrued Accounts Payable GL 2000100 is used at year end to record accruals. This is not a control account

Accounts Payable

▸ Understanding the sub-module transactions in PO and AP will help the reconciler research, understand and resolve reconciling items

▸ Reconcilers should become familiar with AP Voucher Inquiry screens

AP tips

▶ Catch-Up Transactions in FI$Cal

◦ Use Secondary IDs to record Catch-Up Vouchers, such as warrants/payments issued outside of to FI$Cal. These vouchers are not intended to be processed through any Pay Cycle or Payment Creation but are intended solely for recording payments.

◦ When recording manual catch up vouchers that were paid outside FI$Cal, the payment date and reference field in the payments tab of the voucher must match the warrant number exactly as it is on the Notice of Claims Paid form (CD 102). The Reference field must be <u>numbers</u> only (no alpha or special characters and no 'blanks' or 'spaces').

◦ FI$Cal Job Aids 270 – Manually Create Catch-up Transactions 3.0 provides detailed steps on how to manually record a payment made outside FI$Cal.

*Note: FI$Cal only allows one voucher per invoice. Whereas with a claim schedule, it can have multiple invoices per supplier for a claim schedule. In these instances, we recommend you to create one voucher for each supplier to record multiple invoices.

Encumbrance Status Report

▸ To avoid having to close PO's with remaining encumbrance balance of a few cents, the AP Processor can finalize the PO in the AP module.

▸ When the supplier has issued the last invoice to be billed against a PO, the AP Processor will copy the designated PO lines (with receipts) to a voucher and finalize the lines that are copied over. This will trigger the PO module to close the PO.

▸ Refer to FI$Cal Job Aid: FI$Cal.241 - Finalize the PO lines while creating a final Voucher 2.0 for instructions.

Encumbrance Status Report

Examples of PO's that Department PO Buyer may need to close in the PO module:

- PO's created for expenditures paid via Direct Transfers from SCO Journal Entry (JE), the PO Buyer will check if the POs need to be closed. For example, a SCO JE and an Invoice received for Business Cards purchased from Office of State Publishing.

- POs created for any P-Card transactions. The PO Buyer will need to communicate with the AP Processor when the statement have been approved and if vouchers have been created. For example, the query is showing you for PO No. 0000000785 – Amazon.com LLC, the Remaining Encumbrance amount is $62.19, and zero for the Expensed amount. If a voucher was created for the PO, the Buyer will close the PO and release the encumbrance balance . See page 10 Item 2.

- Invoices paid outside of FI$Cal via a claim schedule with linked PO's. The PO Buyer will close the PO's.

Common Reconciling Items

- ORF replenishment JE's and ORF warrant deposits posted in AR Module
  - These process through the CalATERS interface or Journal Voucher replenishment process. Posting will cause duplication

- Voided checks and deposit corrections will create net zero reconciling items in the DR/CR columns

- ORF Travel Advance Reimbursements processed in FI$Cal but warrant not issued from SCO
  - Will show in the CTS GL Activity Report as a debit to Account 1101200, but will not show on the Bank Statement (typically a timing issue and will automatically correct in subsequent month)

- Cash Reclass (i.e., account 1109200) has a balance
  - Cash reclass should net to zero, work with FSC to correct
  - Multiple corrections to a voucher can cause issues that may not completely clear out

Asset Reconciliation

Converted Assets

Beginning balance on financial reports will be derived from converted capital assets. Run GL reports to validate beginning balance on financial reports

Run AM reports to validate converted asset details (capital and non-capital assets) in the AM sub-system

Asset Tracking / Accounting in AM

▸ **Capital Assets**:
- Recorded
- Tracked
- Depreciated
- Reported on year-end financial reports (Report 18 and 19)

▸ **Non-Capital Assets**:
- Recorded
- Tracked

Asset Management Concepts

▸ **Departmental Adjustment Ledger** records:

- ◦ Asset Additions and Dispositions
- ◦ Asset Depreciation

▸ Asset Books:

- ◦ Capital – tracks Capital assets
- ◦ State – tracks Capital and Non-Capital assets

▸ Statewide Asset Profiles function as templates to standardize:

- ◦ Useful life *
- ◦ Asset Classification
- ◦ Depreciation Method (Straight Line)

  * For the Useful Life of Capital Asset, see Job Aid FI$Cal.002-Correctly Classifying Items as Assets

Asset Transactions in AM

1. Assets are created from information on the:

   - Purchase Order (PO)
   - Receipt (PO)
   - Voucher (AP)

   (Refer to Job Aid FI$Cal.246 - Purchase Order (PO) to Accounts Payable (AP) to Asset Management (AM) for Capital Asset 1.0)

2. Assets can be added directly in AM

   (Refer to FTA courses for Entering Assets using Express and Basic Add)

Asset Related Documents

The Asset Reconciler should be familiar with the asset related source documents. The reconciler will have to view the PO, Receipt and Voucher information to verify that asset related transactions have been accurately recorded in the GL.

▸ A Receipt is created from the PO. The receipt provides Physical Information for AM

▸ A Voucher is created by copying from the PO receipt. The Asset Expenditure Account and the Profile ID that was entered on the PO will appear on the Voucher.

▸ Once the asset is vouchered in AP, the financial information is sent to AM and the cost information is recorded.

Asset Related Accounts

Asset Accounts in COA are structured differently than UCM:

- Capital Assets use 5362 series of accounts

- Non-Capital Assets use 5368 series of accounts

- Tangible Asset account series 160xxxx and Intangible Asset account series 162xxxx are used in the Accrual Adjustment Ledger only.

- Depreciation and Amortization expense accounts are used in the Accrual Adjustment Ledger only.

Reconciling Assets in FI$Cal and Tips

▸ It is important to determine a purchase is an "Asset" in the procurement stage. Buyers should talk to Accounting and use the correct accounts and profiles.

▸ Review GL accounts as well, such as office supplies for posting errors. Use Journal Vouchers to correct.

▸ Review GL Activity Report (MODACCRL)to reconcile asset journals and amounts to PO's and Vouchers.

▸ Review GL Activity and journals (DEPTADJ) to reconcile depreciation expense journals to subsidiary reports.

▸ In FI$Cal, the offset account to expenditure allocations is FI$Cal Account 1240030 – Due From General Ledger Journal and Account 2010030 - Due To General Ledger Journal.

Plan of Financial Adjustment – Overview (cont'd)

PFA Logic:

- Transactions included on PFA report:
  - Journal Vouchers (AP) containing Program 9999 or 9900100
  - General Ledger (GL) Journals using journal source: ONL and/or SPJ containing Program 9999, 9900100 or 9900200

SCO/Agency Reconciliation
TIPS

▸ Advances to **ORF, SCIF, SRF** and **Refunds to Reverted Appropriations** are not posted to appropriations in Commitment Control. **Balance Per FI$Cal** for those accounts are **zero** and they should be listed as **Adjustments to FI$Cal** in the SCO/Agency Reconciliation Worksheet and carried all the way until year-end to be reported on financial reports.

▸ Make sure **Clearing Accounts** Balance per FI$Cal is always **Zero**. Expenditures and Encumbrances remaining in the clearing account should be researched and corrected to allocate out to the appropriate programs.

SCO/Agency Reconciliation TIPS

▶ When running the **Budget Overview** query:

◦ use year **1901** as the **From Year** for prior ENYs

◦ for **Appropriation** accounts, use **CC_APPROP** Ledger Group

◦ for **Reimbursement** accounts, use **CC_REV** Ledger Group

◦ for **Revenue and/or Reimbursement** accounts, use **CC_DTL_REV** Ledger Group and **specify** Revenue or Reimbursement account in the **Account Chart Field**

▶ All accruals (Expenditures, Encumbrances, Abatements, Reimbursements, and Revenues) on the FI$Cal SCO/Agency Reconciliation Report can be verified and supported by different accrual queries. Use the queries to find the document numbers (voucher, item numbers etc.) for further research in Accounts Payable or Accounts Receivable modules.

SCO/Agency Reconciliation TIPS

▸ Use the **Delivered Trial Balance Report (GLS7012)** to obtain GL Account detail by ENY and Program. The delivered trial balance supports the **Custom Trial Balance Report (RPTGL061).**

▸ Use the **Ledger Activity Report** to search for **Journal ID's** and **Balances** by GL account. Search by Fund, Appropriation Ref, ENY, Program, and Account etc. Use the Journal ID for further research in other modules.

▸ Analyze **Accrual** data carefully. Report any differences between the FI$Cal SCO/Agency Reconciliation Report, Accruals Query, and the Trial Balance Report to the FI$Cal Service Center.

SCO/Agency Reconciliation TIPS

▶ Make sure the **variance line** at the bottom of the SCO/Agency Reconciliation Worksheet is always **zero** for all accounts.

▶ Make sure the GL accounts **variance column** on the SCO/Agency Reconciliation Worksheet is always **zero**, except for the Encumbrances, Advances to SCIF and SRF.

▶ Explain **variances** and **research** before making corrections.

LAST STEP - Update Online MEC Status

▶ Online Month End Closing (MEC) Reporting Tool (Job aid FI$Cal.335) provides departments the steps on how to report MEC activities online in FI$Cal.

▶ When all tasks reported as "Completed", the MEC Dashboard will report 100% completed for the accounting period.

▶ FI$Cal will produce project status reports based on this data. Therefore, Departments must ensure accurate and timely updates no later than the 1st and the 15th of each month.
